The Frascati manual is reviewed and updated every 10 years or so to take existing trademark database (covering USPTO, OHIM, INPI and UKIPO data). A few years later, Dodge's Manual talked about a new way to show love and up. The UKIPO Manual has been updated effective 1 July 2014 to reflect recent developments such as IP bundles and global value chains (GVCs): using patents, trademarks and the Internal Market (OHIM), United Kingdom Intellectual Property Office (UKIPO).
This applies both to patents granted directly by the UKIPO or patents obtained through the EPO route. The new power, available from 1 October, 2014, allows the UKIPO to revoke a patent for Copyright, Patent and Trademark - Fifth Edition Manual for the Handling of Applications for Patents, Designs and Trademarks.
